What You Need to Know about the Proposed Changes to the Standards

04 May 2023 | 12.00pm – 1.00pm | Zoom

The IIA is transforming the International Professional Practices Framework including the Standards to prepare the internal audit profession for the future. Topics to be covered:

- Introduction and history of the IPPF Evolution project
- New Standards structure and high-level coverage of each domain
- Top changes and/or new different requirements in each domain
- Overview of the public review and comment process

Maximising the Value of Internal Audit

11 May 2023 | 12.00pm – 1.00pm | Zoom

Internal audit supports the Audit Committee (AC) in its risk and internal control oversight responsibilities. ACs can maximise the value proposition of internal audit by exploring the Core Principles of the Institute of Internal Auditors' (IIA) International Standards for the Professional Practice of Internal Auditing (Standards), their presence and how well they are operating.

Extracting the full value out of internal audit necessitates focus and rethinking, as the internal audit function needs to be adequately resourced and develop competencies. This session aims to demonstrate how ACs can enhance the effectiveness of internal audit by realigning their expectations from the internal audit on key critical areas.

Internal Audit as a Profession

18 May 2023 | 12.00pm – 1.00pm | Zoom

How can an internal audit's job transform to maintain their relevance in this era so as to have a better edge over the other professions? What is the main motivation factor to attract the younger internal auditors to meet their career aspirations besides technical skills and functional areas? What should a junior internal audit professional do to advance in his or her career? What are the opportunities open to them to stay in the internal audit profession?

ESG for Internal Auditors

25 May 2023 | 12.00pm – 1.00pm | Zoom

Environmental, Social, and Governance (ESG) risks are complex, multifaceted, and require a nuanced understanding of various factors. The market forces often push companies towards profit-driven decisions at the expense of ESG factors.

To navigate the ESG challenges, internal auditors could adopt a game theory together with an ethical perspective. Join us for this 1-hour webinar where we will explore the game theory, the importance of ethics, and how they interact with ESG. Jeremy will also discuss the role of internal auditors in implementing ESG and what companies can do if they want to implement ESG that faces challenging market forces.
