

Engage. Learn. Connect. Grow

To mark Internal Audit Month, IIA Singapore is launching InsightXchange, a new peer-to-peer learning series. Designed for busy professionals, this collaborative platform offers small-group virtual sessions where members can connect with subject matter experts and senior internal auditors, explore emerging topics, and exchange practical insights.

What to Expect:

- Interactive discussions with SMEs and mentors
- Real-time Q&A and experience sharing
- Practical insights on topics such as cybersecurity, AI, audit methodology, and more
- A supportive space for professional growth

Whether you are new to internal audit or a governance, risk, and compliance professional looking to sharpen your edge, InsightXchange complements your on-demand learning with live, engaging conversations.

Kick-off Topic: Cybersecurity in Focus

Our first session will spotlight cybersecurity – a top concern for many organisations today. Join our expert guest speaker, Bernard Tan, and fellow professionals on 27 May 2025 as we discuss the evolving cyber risk landscape and how internal auditors can play a critical role in managing these challenges.
