

Governance, Risk and Compliance

4-Part Lunchtime Webinar Series

We are excited to announce the launch of the Governance, Risk and Compliance (GRC) 4-Part lunchtime webinar series – a collaboration between IIA Singapore and ACCA Singapore. Effective GRC programmes are critical to business operations, allowing stakeholders to appropriately understand and respond to overwhelming regulations and business policies.

This webinar series brings together leaders from various industries to share perspectives on, and examine solutions to a variety of issues and pressing topics impacting businesses.

Join our webinar series to find out how to address these core challenges in risk management.

Technology Risk Management Guidelines: Enhanced Requirements on Financial Institutions Concerning Technology Risk Governance and Security Controls

6 May 2021 | 12.00pm to 1.00pm (Singapore Time)

Speakers from KPMG Singapore:

**Daryl Pereira, Partner, Head of Cyber Security and
Wendy Lim, Director, Cyber Security Consulting**

Financial Institutions (“FIs”) today face the reality that cyber breaches are not a question of ‘if’, but ‘when’. This, coupled with the need to embrace emerging technologies, accelerated digital transformation and more connectivity to third parties, add to the pressure for FIs to manage increasing technology and cyber risks as well as implementing measures to strengthen operational resilience. In view of the evolving cyber threat landscape, the Monetary Authority of Singapore (“MAS”) has released the updated Technology Risk Management (“TRM”) Guidelines on 18 January 2021.

Join us for a sharing session to explore key highlights of the revised TRM Guidelines and challenges faced by FIs in technology/cyber governance and risk management. The speakers will also discuss industry trends and practices in addressing the proposed regulatory requirements and expectations.
